Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	- Identifies the need to grow crops. - Collects soil information. - Checks weather conditions.	- Opens the OptiCrop application. - Enters soil nutrient values and environmental data. - Submits the information.	- Receives the recommended crop. - Chooses the suggested crop. - Starts cultivation based on the recommendation.
Touchpoint What part of the service do they interact with?	Soil testing report. - Weather information. - Agricultural resources.	- OptiCrop web application. - Input form. - Prediction system.	- Recommendation results page. - Crop information. - Farming decision support.
Customer Thought <i>What is the customer thinking?</i>	- Which crop is best for my land? - Will my soil support the crop? - How can I improve my yield?	Is the entered data correct? - Will the prediction be accurate? - Can I trust this recommendation?	- This crop seems suitable. - I hope it increases my yield. - This recommendation helps me decide confidently.

Process Ownership <i>Who is in the lead on this?</i>	• Farmer • Soil Testing Service • Weather Data Provider	• Farmer • OptiCrop System • Machine Learning Model	• Farmer • OptiCrop System • Agricultural Advisor (if needed)
Opportunities <i>How can we improve this stage?</i>	• Provide accurate soil testing. • Integrate real-time weather data. • Educate farmers on soil health.	• Simplify the user interface. • Improve prediction accuracy. • Support local languages.	• Provide fertilizer recommendations. • Offer crop care tips. • Send timely weather and farming alerts.
